Finanstilsynet, Århusgade 110, 2100 København Ø

**Produced:** 1/1/2018

**You are about to enter into an agreement on a product that is complex and may be difficult to understand.**

## What is this product?

Type	Purchased FX swap														
Objectives	<p>This product is a purchased FX swap.</p> <p>A purchased FX swap is a binding contract between you and the bank consisting of two opposite legs – a short and a long leg. In the short leg, you sell an agreed quantity of currency at a pre-agreed price and value date. In the long leg, you purchase the same currency at a pre-agreed price, quantity and value date, which is later than the value date for the short leg.</p> <p>The rate of the long leg is based on the rate of the short leg adjusted for a premium/discount, which expresses the interest rate differential between the two currencies until the value date on the long leg.</p> <p>Both the short and the long leg are settled over accounts.</p> <table border="0"> <tr> <td>Nominal Amount</td> <td>75,000 DKK</td> </tr> <tr> <td>Currency 1</td> <td>USD</td> </tr> <tr> <td>Currency 2</td> <td>DKK</td> </tr> <tr> <td>Start Date</td> <td>2 business days from the trade date</td> </tr> <tr> <td>Final Date</td> <td>6 months from the trade date</td> </tr> <tr> <td>Exchange Rate Start</td> <td>6.28</td> </tr> <tr> <td>Exchange Rate End</td> <td>6.2</td> </tr> </table>	Nominal Amount	75,000 DKK	Currency 1	USD	Currency 2	DKK	Start Date	2 business days from the trade date	Final Date	6 months from the trade date	Exchange Rate Start	6.28	Exchange Rate End	6.2
Nominal Amount	75,000 DKK														
Currency 1	USD														
Currency 2	DKK														
Start Date	2 business days from the trade date														
Final Date	6 months from the trade date														
Exchange Rate Start	6.28														
Exchange Rate End	6.2														

### Intended retail investor

This product is intended for customers with some financial knowledge and experience, who can withstand losing the entire amount invested, who are interested in increasing their assets, in hedging and in a leveraged position and who are ready to remain in the product until 6 months.

On a risk scale from 1 (high security; very low or low expected returns) to 7 (very high risk tolerance; highest expected return), the product falls within risk category 7.

## What are the risks and what could I get in return?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class.

This rates the potential losses from future performance at a very high level, and poor market conditions could impact the capacity of Alm. Brand to pay you.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

**Performance scenarios**

Investment of 75,000 DKK*		6 months (Recommended holding period)
Scenarios		
Stress scenario <sup>1</sup>	What you might get back after costs	56,457 DKK
	Average return each year	-49.31 %
Unfavourable scenario	What you might get back after costs	72,994 DKK
	Average return each year	-5.33 %
Moderate scenario	What you might get back after costs	79,445 DKK
	Average return each year	11.82 %
Favourable scenario	What you might get back after costs	85,444 DKK
	Average return each year	27.77 %

This table shows the money you could get back over the next 6 months, under different scenarios, assuming that you invest 75,000 DKK.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the recommended holding period. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so.

The figures shown include all the costs of the product itself, and include the costs of your advisor or distributor.

The figures do not take into account your personal tax situation, which may also affect how much you get back.

\* The calculation is based on the notional of the contract (in this example 75,000 DKK).

**What happens if Alm. Brand is unable to pay out?**

You are exposed against the risk that the counterparty to the transaction may be unable to fulfil his obligations with respect to the product, for instance in case of insolvency. The product is not comprised by any protection scheme.

Therefore, it is possible that the counterparty will be unable to cover a loss up to the market value of the product at the particular point in time.

**What are the costs?**

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for the recommended holding period. They include potential early exit penalties. The figures assume you invest 75,000 DKK. The figures are estimates and may change in the future.

**Costs over time**

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment of 75,000 DKK Scenarios	If you cash in at the recommended holding period
Total costs	75 DKK
Impact on return (RIY) per year	-

**Composition of costs**

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- What the different cost categories mean.

**This table shows the impact on return per year**

<sup>1</sup> Please note that the stress scenario has been calculated on the basis of other presupposed conditions than the three other scenarios, and therefore in some cases the result can theoretically be better in the stress scenario than in the other scenarios.

One-off costs	Entry costs	-	The impact of the costs already included in the price. This is the most you will pay, and you could pay less. This includes the costs of distribution of your product.
	Exit costs	0.00 %	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	0.00 %	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.00 %	The impact of the costs that we take each year for managing your investments.

### How long should I hold it and can I take money out early?

Recommended holding period: This product is designed to be held to the agreed maturity date in order to match your investment requirement.

You may not be able to cash in early, and you may have to pay significant extra costs to cash in early. It is a product to be entered into for its term that cannot be easily sold. Early termination may occur (i) if certain events of default or other termination events occur or (ii) at the sole discretion of Alm. Brand Bank A/S, in which case early termination payments may apply.

Early exit impact: If the product is terminated early, in whole or in part, an Early Termination Payment may become payable by either you or Alm. Brand Bank A/S. The Early Termination Payment is linked to market parameters and could be a substantial loss or gain to you. Settlement on early termination will be specific to your Purchased FX swap and will be influenced by a number of factors which include but are not limited to: whether it is an increasing or decreasing foreign exchange environment; the movement of the FX Spot Rate since the trade date; the amount affected by the early termination.

The Early Termination Payment is not a penalty charge. The sum represents the economic value of what Alm. Brand Bank A/S would have paid or received if the product continued as agreed. Depending on market conditions at the time of the early termination, the settlement calculated could result in a substantial amount being due from you to Alm. Brand Bank A/S.

### How can I complain?

Any complaint regarding the product, the conduct of the manufacturer or persons advising on, or selling the product can be submitted under the following website [almbrand.dk/klagemuligheder](http://almbrand.dk/klagemuligheder), in written form to Alm. Brand Bank A/S, Midtermolen 7, 2100 København Ø or via email to [bank.jura@almbrand.dk](mailto:bank.jura@almbrand.dk).

### Other relevant information

Other information may be relevant for this product, for instance information about characteristics and risks. The information is, among other things, included in agreements entered into with the Bank, e.g. framework agreements, service agreements, fact sheets, the advisory basis and in other material received from the Bank.
